DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-23 and 32-38, drawn to a method and an apparatus for aligning and fixing an optical fiber relative to an optical source, classified in class 385, subclass 52.

Group II, claims 24-31, 39 and 40, drawn to a method and an apparatus for supporting and aligning an optical fiber relative to an optical source, classified in class 385, subclass 51.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: groups I and II have different functions, since group I is directed to a method and an apparatus for aligning and fixing an optical fiber relative to an optical source; whereas, group II is directed to a method and an apparatus for supporting and aligning an optical fiber relative to an optical source.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
